Profile

Backend Developer with hands-on experience developing scalable REST APIs, real-time applications, and rolebased web platforms using Python and Django. Skilled in backend architecture, API development, database design, and WebSocket integration. Passionate about building efficient backend solutions and seeking a Backend Developer Internship to contribute to production-grade applications.

Skills

Programming: Python, JavaScript, SQL

Frameworks: Django, Django REST Framework (DRF), FastAPI, React

Databases: PostgreSQL, MySQL, SQLite, Redis

Backend: REST APIs, WebSockets, Django Channels, JWT Authentication, RBAC

Tools & Platforms: Git, Docker, Linux, Postman

Core Concepts: API Development, Database Design, CRUD Operations, Microservices, Unit Testing

Soft Skills: Problem Solving, Team Collaboration, Communication, Debugging

Education

Sindh Madressatul Islam University (SMIU) 2023–2027

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures, Database Systems, Operating Systems, Software Engineering, Computer Networks

Experience

Backend Developer Projects Jan 2025 – Present

- Developed scalable REST APIs using Django REST Framework for real-world backend applications.
- Engineered role-based authentication and secure JWT authorization for multiple user types
- Built real-time communication features using Django Channels, Redis, and WebSockets.
- Designed optimized PostgreSQL database schemas and improved query performance.

Projects

Motors Mania (Vehicle Marketplace)

https://github.com/israr-ax/motors_mania

- Developed a vehicle marketplace platform using Django, React, and PostgreSQL with advanced search and filtering.
- Implemented secure REST APIs with JWT authentication and role-based access control.
- Built real-time buyer-seller chat using Django Channels and WebSockets.

RideShare API (Backend System)

<https://github.com/israr-ax/django-RideShare-API-s>

- Developed a ride-sharing backend using Django REST Framework and PostgreSQL.

- Implemented booking, trip management, and live ride tracking with WebSockets and Redis.
- Integrated backend APIs with an Android application for seamless real-time communication.

Online Examination System

<https://github.com/israr-ax/Online-Examination-System>

- Developed a role-based examination platform using Django with Admin, Teacher, and Student modules.
- Implemented secure authentication, automated result generation, and question management.
- Designed protected routes with role-based access control to ensure secure access.

Additional Information

- Strong interest in Artificial Intelligence, Machine Learning, and scalable AI systems.
- Quick learner with the ability to adapt to new tools, technologies, and development environments.
