

ISRAR AHMED

Backend Developer — Python / Django

Karachi, Pakistan • israrmemon211@gmail.com • +92 347 228 6990 • github.com/israr-ax • linkedin.com/in/israr-ahmed

PROFILE

Backend Developer specializing in Python and Django, with hands-on experience building scalable REST APIs, real-time WebSocket systems, and role-based web platforms. Comfortable owning backend architecture end-to-end from PostgreSQL schema design to secure JWT/RBAC authentication and Redis-backed real-time features. Seeking a Backend Developer Role to contribute to production-grade applications.

SKILLS

- **Languages:** Python, JavaScript, SQL
- **Backend & APIs:** Django, Django REST Framework, FastAPI, REST APIs, WebSockets, Django Channels, JWT Authentication, RBAC, Microservices
- **Databases:** PostgreSQL, MySQL, SQLite, Redis
- **Tools & Platforms:** Git, Docker, Linux, Postman
- **Frontend:** React

EXPERIENCE

Backend Developer — Independent Projects

Jan 2025 – Present

- Built and shipped 50+ REST API endpoints in Django REST Framework, powering three production-style backend systems used end-to-end from database to client.
- Engineered JWT-based authentication and role-based access control (RBAC) for 3 distinct user roles across multiple platforms, eliminating unauthorized-access risk.
- Built real-time features with Django Channels, Redis, and WebSockets, supporting 5-10+ concurrent connections with sub-40ms message delivery.
- Designed and indexed PostgreSQL schemas, cutting key query response times by 50% through query optimization.

PROJECTS

Motors Mania — Vehicle Marketplace Platform | *Django, React, PostgreSQL, DRF*

[Github](#)

- Shipped a full-stack marketplace connecting buyers and sellers, supporting 15+ live listings with advanced search and filtering.
- Secured the platform with JWT authentication and RBAC across buyer, seller, and admin roles; built real-time buyer-seller chat with Django Channels and WebSockets, cutting message latency to under 40ms.

RideShare API — Backend Booking & Tracking System | *DRF, PostgreSQL, Redis, WebSockets*

[Github](#)

- Built a ride-sharing backend handling booking, trip management, and live location tracking for 5-10 concurrent rides, integrated with an Android client via REST APIs.

Online Examination System | *Django, PostgreSQL*

[Github](#)

- Delivered a role-based exam platform (Admin, Teacher, Student) automating result generation for 20+ students, with protected, RBAC-secured routes.

EDUCATION

Sindh Madressatul Islam University (SMIU), Karachi — BS Computer Science, 2023–2027

Relevant Coursework: Data Structures, Database Systems, Operating Systems, Software Engineering, Computer Networks
